# JavaScript Assessment Test 5

- Write a function that takes an array of numbers as argument
- Convert the array to an object
- It should have a key for each unique value of the array
- The corresponding object value should be the number of times the key occurs within the array

| | | |
|---|---|---|
| myFunction([1,2,2,3]) | Expected | {1:1,2:2,3:1} |
| myFunction([9,9,9,99]) | Expected | {9:3,99:1} |
| myFunction([4,3,2,1]) | Expected | {1:1,2:1,3:1,4:1} |
